*ESPA (European Standard Parking Award). The highest parking quality certification in Europe. ** Ionisation system which reduces particles as well as fine and ultrafine particles in the air.

Profile

A European specialist in the urban mobility sector, Interparking provides its customers with more than 418,000 parking spaces in Europe, combined with a strong digital experience.

In the space of 60 years, Interparking has become a European leader in the urban mobility sector. We are developing a range of innovative products and services that meet the needs of major European cities. Every day, our teams help to facilitate travel in and around urban centers, focusing on three strategic priorities:

- continuous improvement in the **quality** of our services;
- an innovative offer of **mobility** solutions to meet the challenges facing cities;
- an **environmentally** responsible policy.

MULTIMODAL CAR PARKS
(SITUATED CLOSE TO
PUBLIC TRANSPORT)

Interparking has a strategic presence in nine European countries: Belgium, the Netherlands, France, Germany, Austria, Italy, Spain, Poland and Romania. Our customers can choose from 956 parking sites, representing a total of 418,511 spaces across the continent. If you were to take all the vehicles parked there and line them up bumper to bumper, the queue would stretch for more than 2,000 kilometers!

In 2019, the Interparking Group achieved economic sales of €484.0 million, which represents an economic EBITDA of €148.4 million. Every year, we add new developments, acquisitions or renovations to our portfolio of car parks. Not only do these appeal to users, they also attract the approval of third parties. In fact, to date, Interparking - a member of the European Parking Association and a number of local parking federations - has received 209 European Standard Parking Awards. These certifications acknowledge the hard work of our teams and show our customers that they have made the right choice.

SMOOTHER JOURNEYS

Interparking is a real player in the mobility policies of major European cities. In addition to providing parking spaces, we are developing a comprehensive range of services to make life easier for road users:

- a digital Interparking experience in the nine countries where the Group operates;
- car parks connected to public transport stations;
- innovative and safe solutions for cyclists;
- flexible payment methods;
- cutting-edge technology to facilitate guidance;

- services tailored to new types of mobility, such as electric or shared vehicles;
- a warm welcome with the emphasis on human contact;
- pricing based on the service level and tailored invoicing for business customers;
- etc.

DIGITAL ENTERPRISE

Besides having a strategic physical presence, Interparking also provides users with an optimal digital experience: in each country where we operate, you can now reserve a space, take out a subscription or order a Pcard via our digital channels. The installation of new-generation entry terminals, fitted with smart cameras, is gradually enabling people to enter and exit our car parks without having to present a ticket or a Pcard, thanks to license plate recognition.

ENVIRONMENTAL RESPONSIBILITY

The use of energy-efficient solutions such as LED lighting, the provision of spaces reserved for shared vehicles and the increased number of charging terminals for electric vehicles all contribute toward a healthier environment for us all. Since April 2019, we have gone one step further by fitting out Beffroi car park in Namur with a fine and ultrafine particle neutralization

system. This was a first in Europe. Since then, we have gradually rolled out these “Lungs of the city” to the Group’s other car parks.

Another sign of our commitment to combating climate change is that we became the first company in Belgium to take out a green loan, the total cost of which is linked to environmental performance criteria. Furthermore, by reducing our electricity consumption and supporting CO₂ reduction projects in emerging countries, we have succeeded in offsetting all our carbon dioxide emissions. This approach means that Interparking is certified as a “carbon neutral” company in all the countries where we operate.

PARTNERING WITH MOBILITY STAKEHOLDERS

Engaging in regular dialog with all our stakeholders is essential in order to stimulate innovation, respond to new societal needs and strengthen our position in a highly competitive market. To design the mobility of the future, we are in constant consultation with our institutional customers, daily road users, the authorities and local residents.
